Subject: Microsoft Settlement

I reject the proposed settlement with Microsoft as being inadequate and incomplete. I do not believe that it will overcome or redress the the wrongs committed by Microsoft, which has operated as a monopoly far too long. Please review and implement the proposals found in Dan Kegel's excellent analysis found at <http://www.kegel.com/remedy/remedy2.html>

Only with a comprehensive solution, strictly enforced, can we hope to restore competition to the PC industry.

Thank You.
